

Client: OeMAG

Duration: 2009 – ongoing

Location: Austria

KPC provides technical assistance to OeMAG, the manager of the Austrian federal support scheme for small-scaled hydropower plants. Thus, KPC is responsible for the technical, economic and financial evaluation of the applications (around 50 per year). KPC produces an evaluation report for each hydropower plant. The evaluation reports serve as the basis for the decision on whether the plant is eligible for support.

The final beneficiaries are private citizens as well as municipalities across all of Austria.

Moreover, the activities include consultancy services for general program creation and development.

Types of services provided:

- Technical, economic and financial evaluation of project applications
- Appraisal of those projects
- Supporting the client in the development of the support scheme
