

Client: Federal Ministry for Agriculture, Forestry,
Environment and Water Management

Duration: 2009 – ongoing

Location: Austria

The grant scheme covers financial support for public applicants (municipalities, municipal cooperation, regions, etc.) as well as private applicants. The overall goal of the support scheme is to improve the condition of Austria's surface water in terms of restructuring, fish migration, and renaturation.

Kommunalkredit Public Consulting manages the program on behalf of the Federal Ministry of Agriculture, Environment and Water Management from receiving the grant funding applications, appraising the funding applications including all technical supporting documentation (technical, economic and financial evaluation), concluding the funding agreements and fiduciary management (disbursing the grant funds, monitoring of the compliance with the grant conditions).

KPC services the entire support process, acting as an interface between clients, as the providers of funds, and applicants for support. The range of services includes:

- Technical appraisal of projects in the field of flood protection
- Economic appraisal of those projects
- Evaluation according to standardized cost-benefit analysis
- Management of grants (approx. 15 Mio. Euro per year)
- Monitoring and reporting
